Doorglass Shades

Tan Doorglass Blinds

No Dusting

No dangling cords or clanging blinds.

Blinds and shades are sealed between tempered safety glass.

Safe for children and pets. Reduces allergen exposure.

Doorglass Treatments Distinguish Your Home.

Save energy and housework. Increase perceived value.

Add Perceived Value

Over 80% of consumers surveyed in a national study liked having doorglass blinds in the door.

50,000 slam cycle test

10,000 operating cycle test

Save Energy

Doorglass blinds can reduce solar heat gain up to 77% and reduce heat loss up to 28% to exceed ENERGY STAR® and green building criteria. See back page for more details.

Proven Performance

ODL introduced the first doorglass blinds in 1997. Product warranties are backed by rigorous performance testing.

Severe Weather® Blinds

Raise/Lower & Tilt
20 Year Warranty | Available in White Only

ODL Severe Weather® Doorglass meets the ASTM C1172 standard for laminated glass. During the stringent laminated manufacturing process, inherent marks may appear. Slight bubbles, lines or surface imperfections are not considered glass defects.

Patented

- Certified for use in high velocity hurricane zones.
- Suppresses sound with an STC* value of 36.

* STC = Sound transmission coefficient.

Sliding Patio Door with Blinds Between Glass

A complete door-and-frame system
Raise/Lower & Tilt
10 Year Parts, 1 Year Labor

FRAME & PANEL COLORS

White

Desert Sand

Sliding Patio Door with Blinds between Glass right-sided slide NEW 300829 white or desert sand

Sliding Patio Door with Blinds between Glass left-sided slide NEW 300830 white or desert sand

The all-in-one ODL Sliding Patio Doors with Blinds Between Glass offers a new level of control, convenience and durability in a sliding glass door.

Control Light and Privacy

- Visual Privacy – Create a wide open view or enjoy complete privacy
- Natural Light – Open for maximum light or closed to reduce glare and solar heat gain

Convenience and Durability

- No dusting, easy to maintain
- No exposed cords reduce safety risks
- Blinds move in sync with the door and are never in the way
- Blinds are thermally sealed between two panels of glass

Light-Touch® controls easily raise and lower the blinds. Tilt control allows for precise adjustments of the blinds.

Doorglass Shade

Raise/Lower
10 Year Warranty

- Shades are sealed between tempered safety glass.
- Light-Touch® controls easily raise and lower internal shade.
- Lift from the bottom, lower from the top.

Half Doorlight
684/672-RLS

Full Doorlight
686/687-RLS

U.S. Patent No. 7,543,623

Shades are protected behind tempered safety glass.

Light-Touch® controls easily raise and lower shade.

Lift from the bottom, lower from the top, or both.

Patio Door Blinds Between Glass

Energy Saving Performance

Blind slats or shades can be controlled to limit solar heat gain.
Low-E glass is available to block heat flow.

Door with full glass	1" clear	1" Low-E	Clear Blind	Low-E Blind	Low-E Internal Muntin Blind
U-Factor	0.35	0.30	0.33	0.29	0.25
SHGC	0.34	0.28	0.08-0.30	0.08-0.18	0.08-0.26

Values are based on a steel door with wood edge. Values vary based on door type. See odl.com for more information.

Thermal Performance Standards

ODL Doorglass Blinds & Shades can be used in doors to meet ENERGY STAR® and new green building criteria.

U-Factor = % of heat energy transmitted,
lower values mean less heat flow in or out.

SHGC = % of solar heat energy transmitted,
lower values mean less heat gain.
